# 1. Introduction

ClockIt is totally customizable analog clock for iOS devices.

To change clock look just tap on part you want to change and adjust the settings. Changes are

visualized immediately.

ClockIt is delivered with many predefined themes, which can be easily customized. New themes can be created by duplication of existing themes.

App supports iCloud data synchronization – ClockIt themes and settings on all iOS devices with the same iCloud account will be synchronized.

You can create infinitely many new themes, which will be automatically shared by all your iOS devices.

Due to the fact that not all fonts from iOS are present in tvOS - to share ClockIt themes between iOS and tvOS you should use fonts – with “(tv)” in the name. Those fonts are present in both OS. Themes compatible with Apple TV will be marked with “(tv)” in the name.

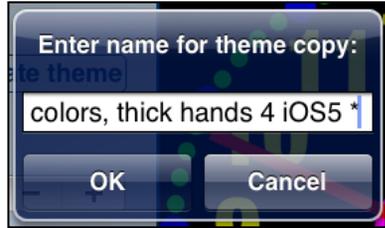

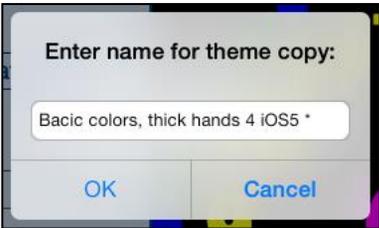

App “Help-function” available in the app or on WWW contains detailed description of all functions and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all not saved data will be restored.

App is optimized for iOS9, iOS8, iOS7, iOS6, tvOS9.

Pictures in current documentation are taken mainly from iPhone 6 Plus, iOS8.x and iOS7.x version of ClockIt. On devices, which are running older versions of iOS (6.x and 5.x) some controls will look slightly different. Following table contains couple of examples of such differences.

	iOS6.x	iOS9, iOS8, iOS7, iOS6
Picker		
Stepper		
Slider		
Text field		

Switch		
Alert	 <p>and</p> 	 <p>and</p> 

Here you can see examples of differences in layouts of views on different iOS devices.

## Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

### 3. Clock theme

Clock theme is collection of clock settings, such as colors, sizes, etc.

Picture shows all ClockIt adjustable elements in different colors:

	<a href="#">Clock face border</a>
	<a href="#">Clock face</a>
	<a href="#">Clock background</a>
	<a href="#">Settings button</a>
	<a href="#">Clock numbers</a>
	<a href="#">Hour marks</a>
	<a href="#">Minute marks</a>
	<a href="#">Hour hand</a>
	<a href="#">Minute hand</a>
	<a href="#">Seconds hand</a>

In more details clock theme contains following settings:

- 1) Theme name.
- 2) Predefined indicator – marks predefined themes - themes which were installed with app.
- 3) Read-Only indicator - predefined themes are always read-only and cannot be changed to editable. Read-only indicator can be used for protecting of users themes from accidental changes.
- 4) [Clock face border](#) color.
- 5) [Clock face](#) color.
- 6) [Clock face](#) radius factor – relation of clock face radius to clock radius.
- 7) [Clock face border](#) width factor – relation of clock border width to clock radius.
- 8) Show/hide [seconds hand](#) indicator – determines if seconds hand is visible.

- 9) Number of [Clock numbers](#).
- 10) Number of [Minute marks](#)
- 11) Number of [Hour marks](#).
  
- 12) [Seconds hand](#) length factor – relation of seconds hand length to clock radius.
- 13) [Seconds hand](#) width factor – relation of seconds hand width to clock radius.
- 14) [Seconds hand](#) axis radius factor – relation of seconds hand axis radius to clock radius.
- 15) [Seconds hand](#) color.
  
- 16) [Minute hand](#) length factor – relation of minute hand length to clock radius.
- 17) [Minute hand](#) width factor – relation of minute hand width to clock radius.
- 18) [Minute hand](#) axis radius factor – relation of minute hand axis radius to clock radius.
- 19) [Minute hand](#) color.
  
- 20) [Hour hand](#) length factor – relation of hour hand length to clock radius.
- 21) [Hour hand](#) width factor – relation of hour hand width to clock radius.
- 22) [Hour hand](#) axis radius factor – relation of hour hand axis radius to clock radius.
- 23) [Hour hand](#) color.
  
- 24) [Hour mark](#) height factor – relation of hour mark height to clock radius.
- 25) [Hour mark](#) width factor – relation of hour mark width to clock radius.
- 26) [Hour mark](#) color.
- 27) [Hour mark](#) radius factor – relation of hour mark radius to clock radius. Here “hour marks radius” is distance from clock center to clock hour marks.
- 28) [Hour mark type](#).
  
- 29) [Minute mark](#) height factor – relation of minute mark height to clock radius.
- 30) [Minute mark](#) width factor – relation of minute mark width to clock radius.
- 31) [Minute mark](#) color.
- 32) [Minute mark](#) radius factor – relation of minute mark radius to clock radius. Here “minute marks radius” is distance from clock center to clock minute marks.
- 33) [Minute mark type](#).
  
- 34) [Clock numbers](#) height factor – relation of numbers height to clock radius.
- 35) [Clock numbers](#) color.
- 36) [Clock numbers](#) radius factor – relation of clock numbers radius to clock radius. Here “clock numbers radius” is distance from clock center to clock numbers.
- 37) [Clock numbers](#) font name.
  
- 38) [Clock background](#) color.
- 39) [Settings button](#) color.

#### 4. Clock view

It is view you will usually see when you start the app.

View contains:

- Clock, which you can customize
- Settings-button

When app was terminated in another view, next time you start app you will be directed to that view.

Here is detailed description of controls available from Clock view:

Swipe to the left	Switch to next clock theme.
Swipe to the right	Switch to previous clock theme.

Tap on clock element

Activates one of property views dependent on what clock element was tapped:

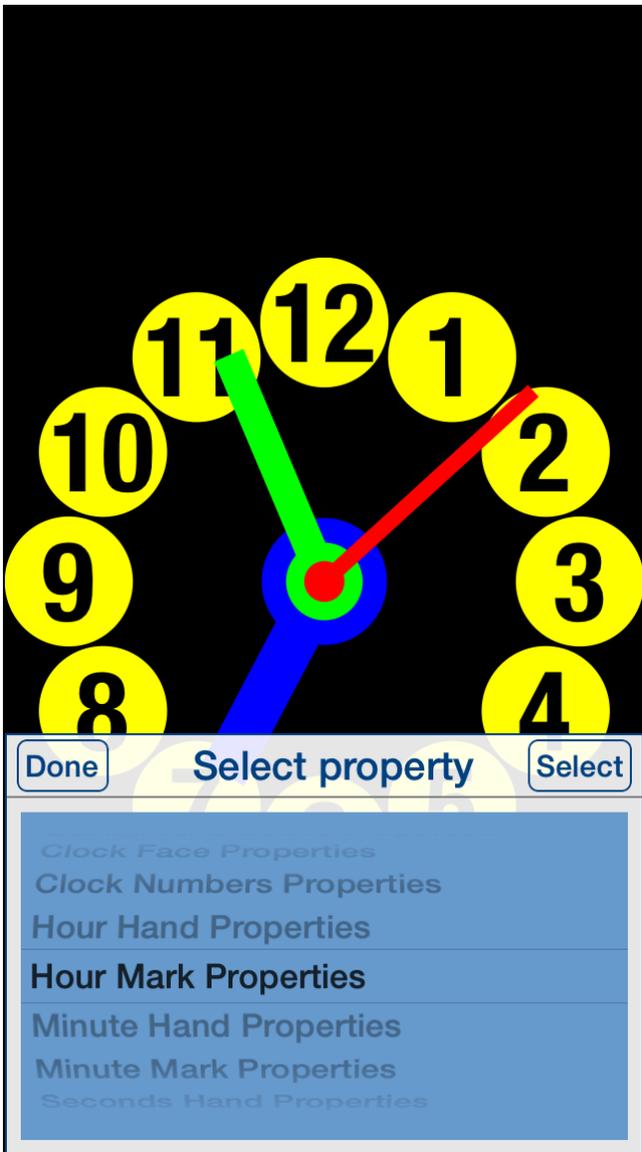

- 1) [Background colors](#)
- 2) [Clock face](#)
- 3) [Clock numbers](#)
- 4) [Hour hand](#)
- 5) [Hour mark](#)
- 6) [Minute hand](#)
- 7) [Minute mark](#)
- 8) [Seconds hand](#)

Activates [Settings view](#) – view used to change common app parameters and options.

### 4.1 Select property

Sometimes tapping on clock element does not select exactly what you want. The reason might be too small distance between clock elements or clock elements overlap. In such case just double tap on screen - selection picker will pop-up and you will have possibility to choose clock element to change or inspect.

Controls in this view:

	Terminate the view without selecting clock property.
Tapping on any place outside the view.	Same as Done-button.
Double tapping on any place outside the view.	Same as Done-button.
	Select property and switch to property view.

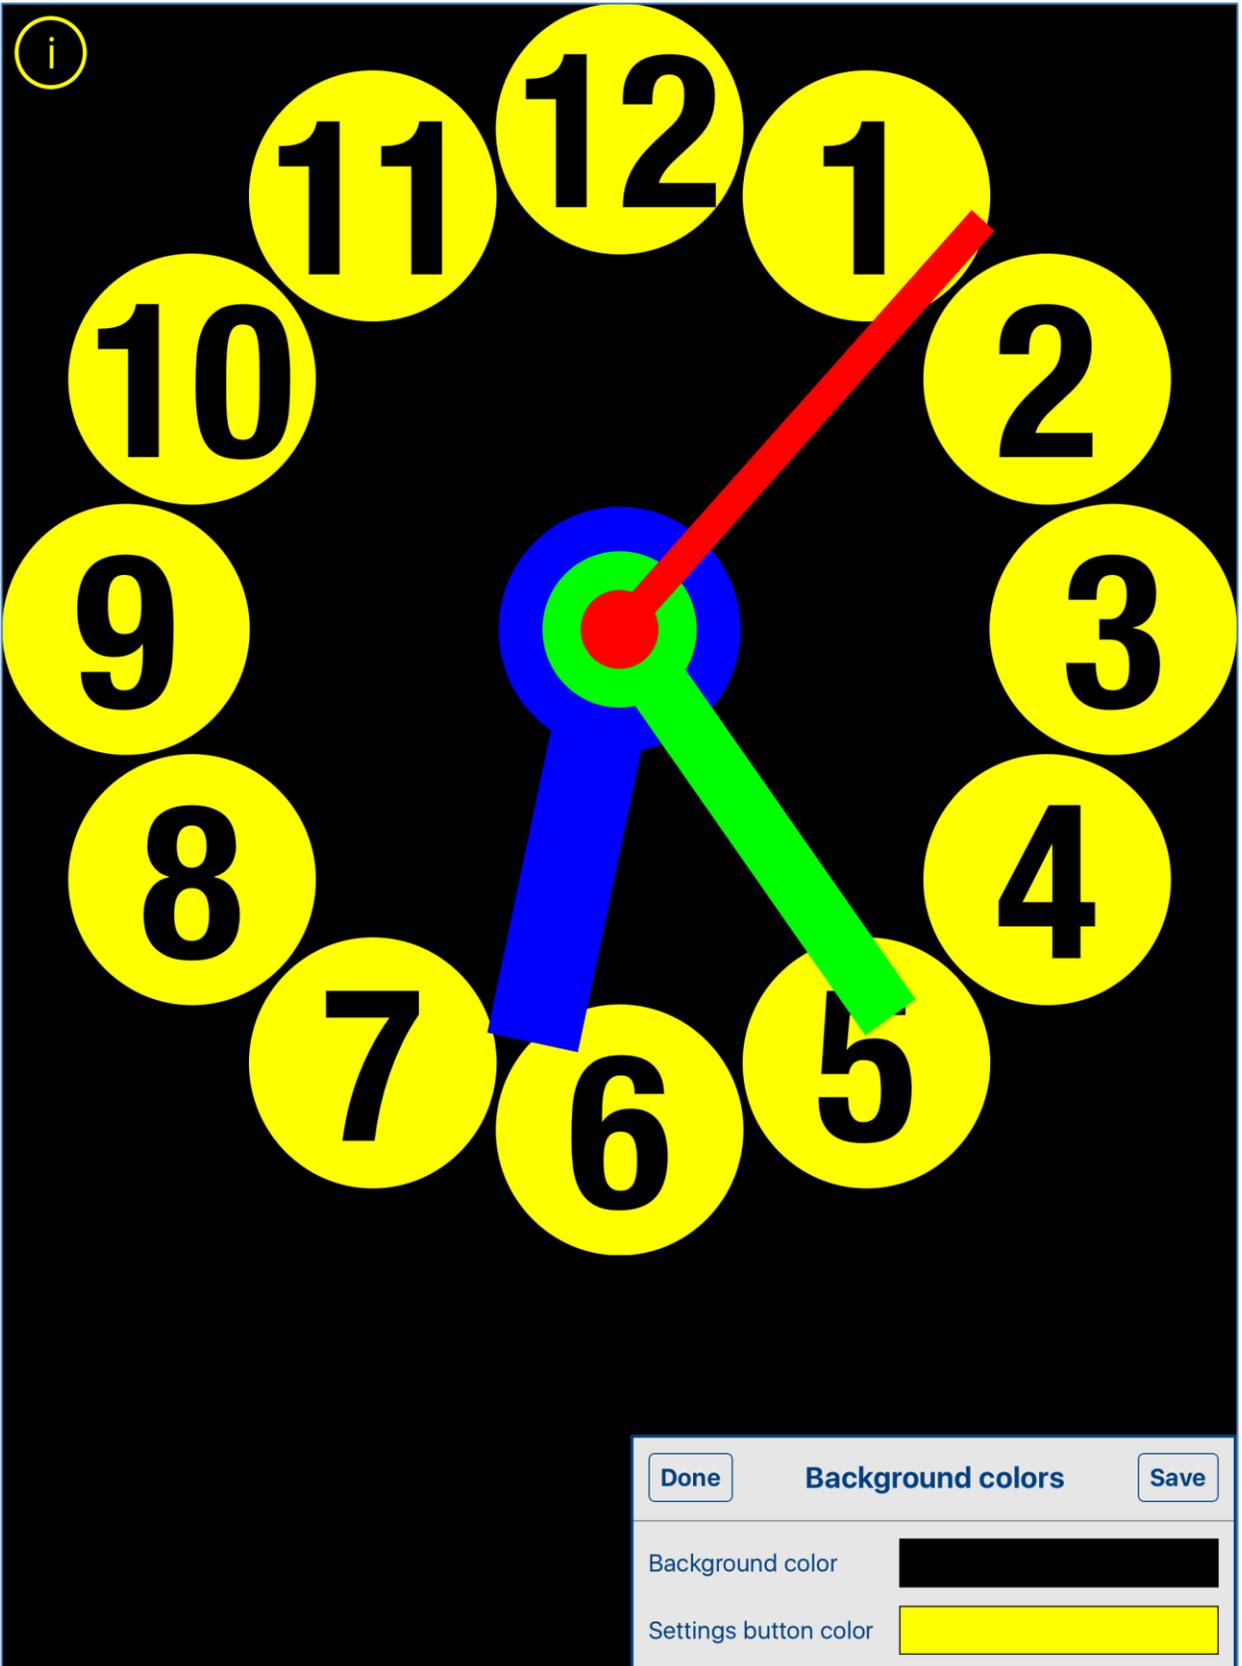

Double tapping on picker.

Same as Select-button.

*Clock Face Properties*  
*Clock Numbers Properties*  
*Hour Hand Properties*  
**Hour Mark Properties**  
*Minute Hand Properties*  
*Minute Mark Properties*  
*Seconds Hand Properties*

Property picker - selects required clock property.

## 4.2 Background colors

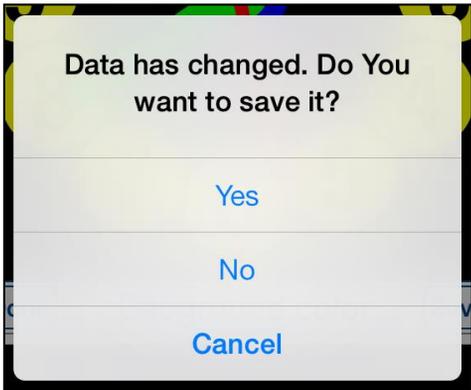

This view is used for adjusting of colors for clock background and Settings-button.

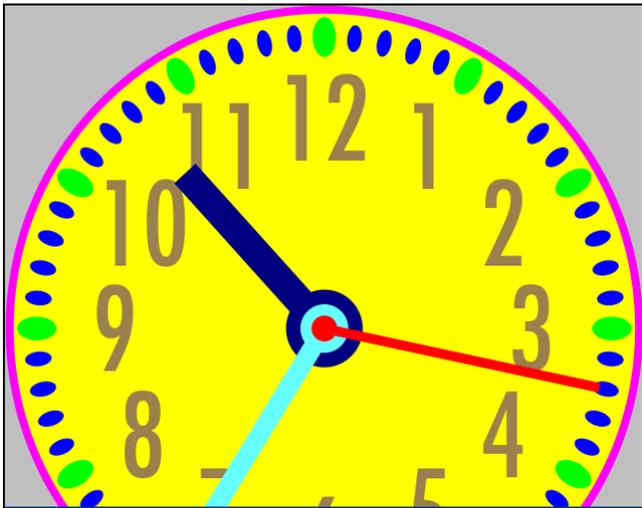

View is activated by tapping on any place outside clock face or by using [Select property](#) view.

When activated Settings-button usually located in bottom-right corner is moved to top-left corner to avoid covering it by the view.

Controls in this view:

	<p>Terminate view without saving.</p> <p>When changes were made, user will be prompted for decision what to do by showing the following alert:</p> <p><b>Data has changed alert</b></p>  <p>User will have three possibilities:</p> <ol style="list-style-type: none"><li>1) Save changes and exit, by choosing "Yes".</li><li>2) Discard changes and exit, by selecting "No".</li><li>3) Continue editing, by selecting "Cancel".</li></ol>
<p>Tapping on any place outside the view.</p>	<p>Same as Done-button.</p>
	<p>Save data and terminate view.</p>
<p>Settings button color </p>	<p>Tapping on it activates <a href="#">Color picker</a> for Settings-button.</p>

### 4.3 Clock face

This view is used for adjusting of properties of clock face.

View is activated by tapping on empty place on clock face or by using [Select property](#) view.

Done
**Clock face**
Save

Border color

Border width factor 0.025 - +

Theme picker – used for selection of active clock theme.

Themes compatible with Apple TV will be marked with “(tv)” in the name.

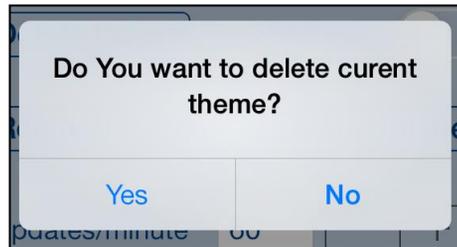

Theme picker – used for selection of active clock theme.

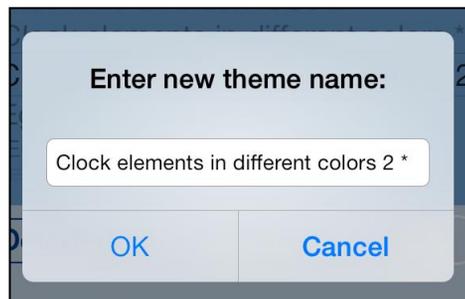

[Read-only indicator](#) for theme.

Button activates deletion of theme. To delete theme tap “Yes”:

Button activates renaming of theme. Enter new name and confirm it by tapping on “OK”:

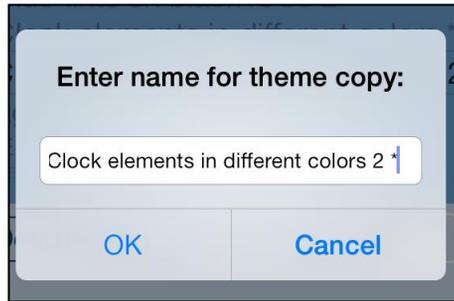

Double tap on Theme picker.

Same as Rename-button.

**Duplicate theme**

Button activates duplication of theme. Enter name for new copy and confirm it by tapping on “OK”:

Updates/minute

60

–

+

Determines frequency of clock update. When frequency is 1 update/minute seconds hand is not shown. When you chose higher update frequency the seconds hand will move more smoothly.

Tick  
tock

Activates/deactivates clock “tick-tock” sound. When activated clock tick-tocks every second.

Auto lock

Activates/deactivates “Auto lock” of your iOS device.

Use it with care – setting Auto-lock to off when iPhone/iPad is not connected to the charger will quickly empty device battery.

Sync

Activates/deactivates of synchronization of all clock setting with iCloud. When deactivated only theme data is synchronized.

Click

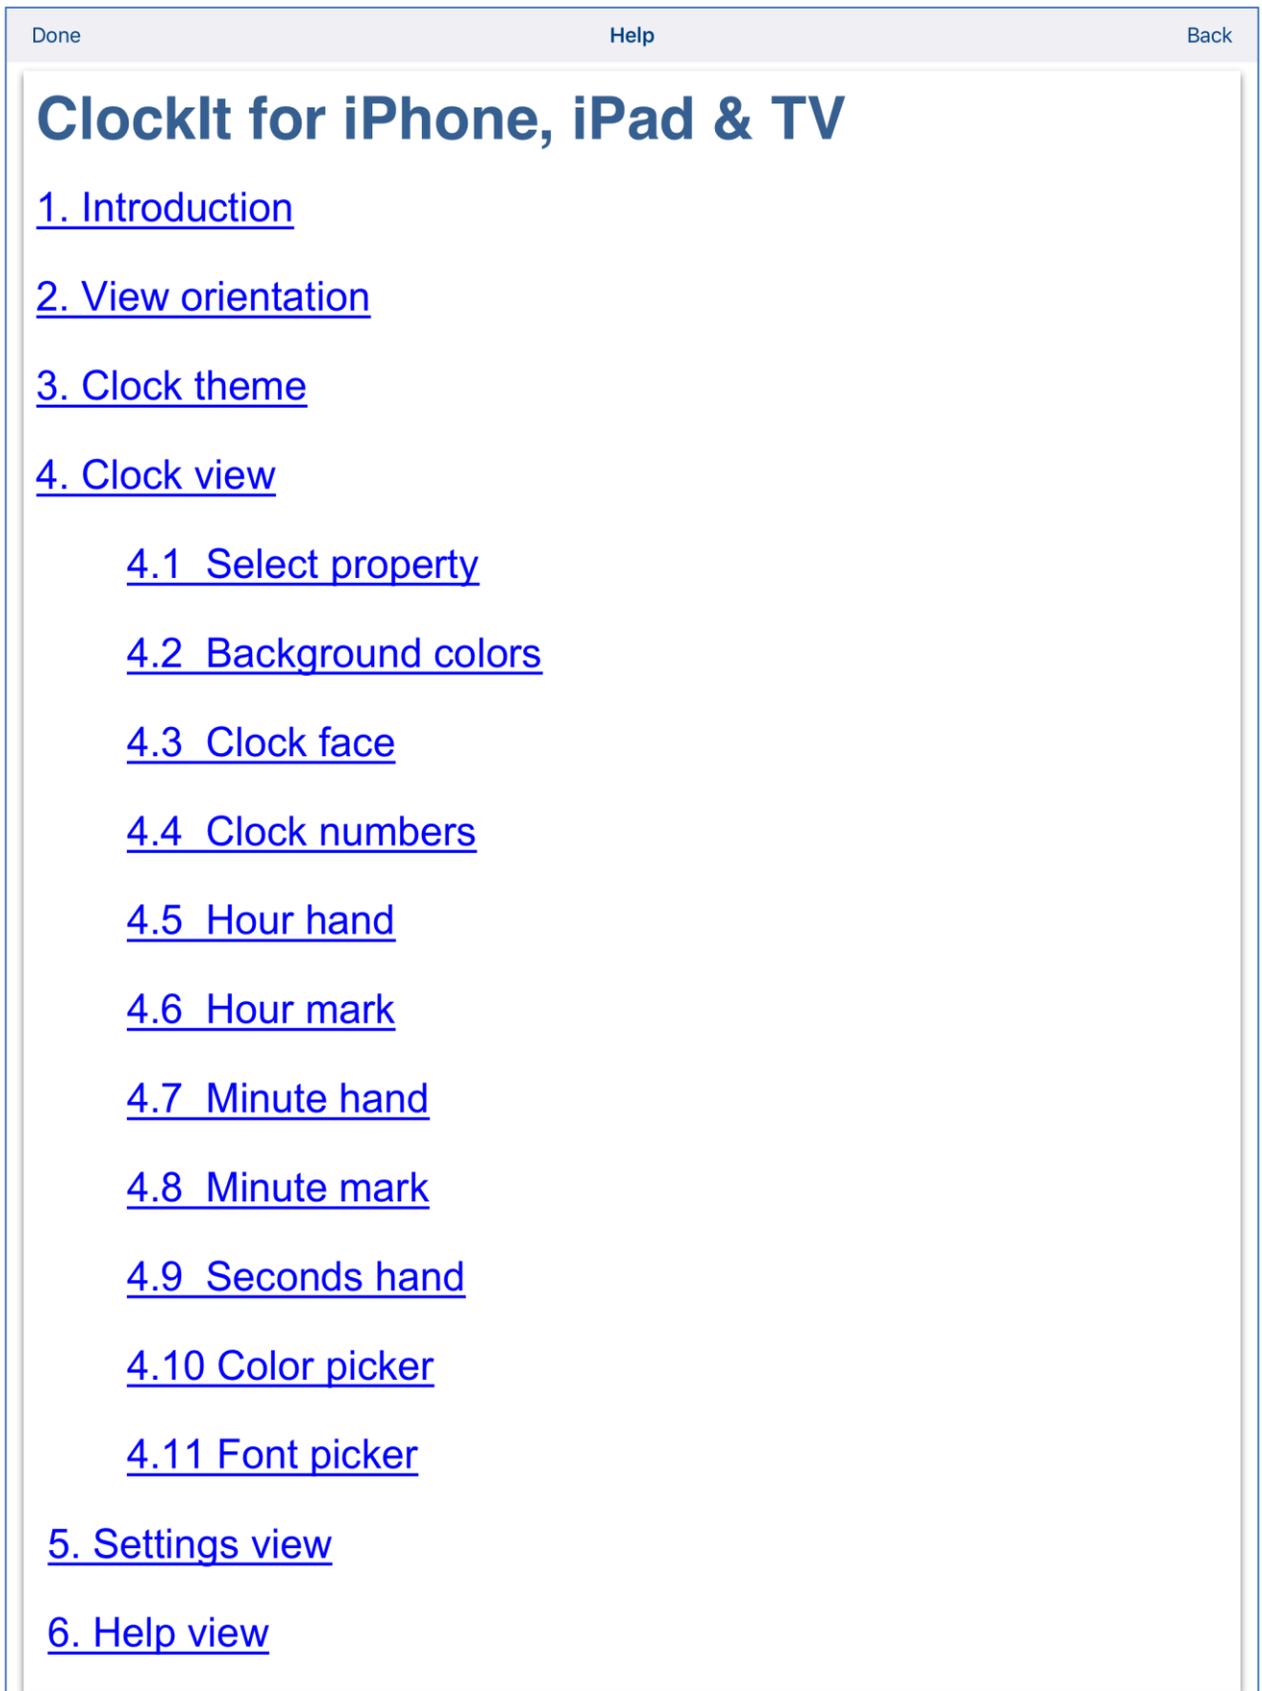

Determines if “click” sound is used in app.

Sound volume

Determines volume of sound effects of app.

## 6. Help view

This view shows user guide for app.

Controls available in this view:

<p>Done</p>	<p>Terminate view.</p>
<p>Swipe to the right</p>	<p>Same as Done-button.</p>
<p>Back</p>	<p>Navigate to previous place in help.</p>
