

LocateIt for iPhone & iPad

[1. Introduction](#)

[2. View orientation](#)

[3. Main view](#)

[4. Settings view](#)

[5. Help view](#)

1. Introduction

LocateIt helps you to find your geographic position, altitude, speed, coordinates and distance travelled.

More exactly app shows and updates in real time:

1. Your location on map.
2. Address:
 - a. Street.
 - b. Sub-locality, postcode.
 - c. Locality.
 - d. Sub-administrative area.
 - e. Administrative area.
 - f. Country.
3. Altitude (meters/feet above mean sea level).

4. Coordinates (latitude and longitude).
5. Course.
6. Speed, average speed from reset.
7. Distance from reset.
8. Maps can be shown as:
 - a. Standard.
 - b. Satellite.
 - c. Hybrid.

To copy to pasteboard (clipboard) information from map-view just "long-press" on it. You can copy:

- Address,
- Coordinates,
- Speed and altitude,
- Distance.

"Long pressing" outside of

information fields will copy to
pasteboard (clipboard) information
from all fields.

App is totally customizable – you
can precisely configure what
information is presented on
screen.

App supports iCloud data
synchronization – Locatelt
settings on all iOS devices with
same iCloud account will be
synchronized.

App “Help-function” available in
the app or on WWW contains
detailed description of all
functions and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all not saved data will be restored.

LocateIt utilizes new iOS7 feature: Background Fetch – app status is updated in the background.

App is optimized for iOS9, iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken mainly from iPhone 6

Plus, iOS8.x and iOS7.x version of Locatelt. On devices, which are running older versions of iOS (5.x and 6.x) some controls will look slightly different. Following table contains couple of examples of such differences.

Button

iOS5.x, iOS6.x

iOS7.x, iOS8.x, iOS9.x

Info button

iOS5.x, iOS6.x

iOS7.x, iOS8.x, iOS9.x

Segmented control

iOS5.x, iOS6.x

iOS7.x, iOS8.x, iOS9.x

Slider

iOS5.x, iOS6.x

iOS7.x, iOS8.x, iOS9.x

Switch

iOS5.x, iOS6.x

iOS7.x, iOS8.x, iOS9.x

Alert

iOS5.x, iOS6.x

and

iOS7.x, iOS8.x, iOS9.x

and

Here you can see examples of differences in layouts of views on different iOS devices.

2. View orientation

All app views work in portrait and landscape orientation

Portrait orientation

or

Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

3. Main view

It is view you will usually see when you start the app.

View contains:

- Map.
- Address:
 - a. Street.
 - b. Sub-locality, postcode.
 - c. Locality.
 - d. Sub-administrative area.
 - e. Administrative area.
 - f. Country.
- Altitude (meters/feet above mean sea level).
- Coordinates (latitude and longitude).
- Course.
- Speed, average speed.
- Distance from reset.

- Segmented control for selection of map type. Maps can be shown as:
 - a. Standard.
 - b. Satellite.
 - c. Hybrid.
- Reset button.
- Settings button.

When app was terminated in another view, next time you start app you will be directed to that view.

Here is detailed description of controls available from Clock view:

Current location on map.

Address of current location.

0.0 mamsi

118.0 km/h[87.2]

- Altitude
- Current speed [average speed – average speed from last reset].

Shows direction to true north.
When top of map is oriented to
true north compass is not
shown

lat: 37.3336800
lon: -122.0502831
course: 255.59

Shows current latitude,
longitude and course.

Course might have following
values:

- “none” – you are stationary
– not moving.
- number from 0.00 to
359.99:
 - 0.00 you are moving
north.
 - 45.00 you are moving
north-east.

- 90.00 you are moving east.
- 135.00 you are moving south-east.
- 180.00 you are moving south.
- 225.00 you are moving south west.
- 270.00 you are moving west.
- 315.00 you are moving north-west

0:01:05 h

1.58 km

- Time.
- Distance from last reset.

Swipe on map view

Changes part of map shown on screen.

Pinch (with two finger)

Zoom in map view and zoom out map view.

Rotate (with two finger)

Rotate map view.

Double tap on view

Zoom in map view.

Map

Satellite

Hybrid

Segmented control for selection of map type. Maps can be shown as:

- Standard.
- Satellite.
- Hybrid.

Reset

Resets accumulated distance and time.

Carrier 

12:18 PM

I-280 N
Belmont Heights
94002 Belmont
San Mateo
CA
United States, US

Springs Cross
lat: 37.4984461
lon: -122.3157603
course: 305.16

**Coordinates copied
to pasteboard
(clipboard)**

0.0 mamsl
121.9 km/h[119.2]

0:17:04 h
33.94 km

Map

Satellite

Hybrid

Reset

"Long-press" outside of information fields: Address, Coordinates, Speed and altitude, Distance.

All information fields is copied to pasteboard (clipboard) and message box shows what was copied.

When you later on paste information into another app it will look like:

Date/time: 11/22/15, 6:02:48
AM

Address:
95014 Cupertino
Santa Clara
CA
United States, US

Coordinates:

lat: 37.3323314

lon: -122.0312186

course: none

Altitude and Speed:

0.0 famsl

0.0 mph[65.2]

Time/distance:

0:02:17 h

4.02 mile

When Locatelt is active (running in foreground or in background) and your device does not change location during 5 minutes the following alert will be shown:

Carrier

12:49 PM

95014 Cupertino

Santa Clara

CA

United States, US

lat: 37.3323314

lon: -122.0312186

course: none

Update of location stopped
due to remaining stationary.

Tap Activate to re-activate
update of location.

Activate

0.0 mamsl

0.0 km/h[103.1]

0:47:38 h

81.89 km

Map

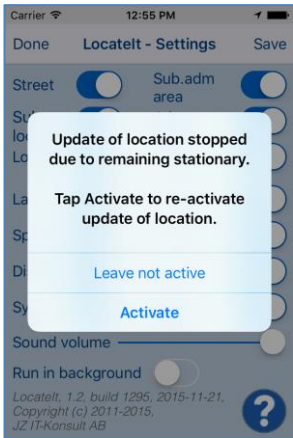

Satellite

Hybrid

Reset

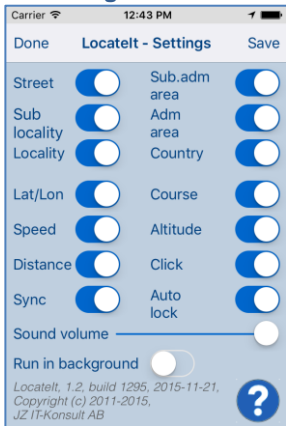

or

Update of location is terminated and Auto-lock is turned on (activated) – all of it is done to save device battery.

4. Settings view

This view allows you to configure system parameters and settings. From this view you have also access to [Help view](#).

Here is detailed description of controls available from Settings view:

Done

Terminate view without saving of data.

When changes were made, user will be prompted for decision what to do by showing following alert:

User will have three possibilities:

- 1) Save changes and exit, by choosing "Yes".
- 2) Discard changes and exit, by selecting "No".
- 3) Continue editing, by selecting "Cancel".

Swipe to the right

Same as Done-button.

Save

Save data and terminate view.

Show [Help view](#).

Street

Display “street” component of address.

Sub
locality

Display “sub-locality”
component of address.

Locality

Display “locality” component of
address.

Sub.adm
area

Display “sub-administrative
area” component of address.

Adm
area

Display “administrative area” component of address.

Country

Display “country” component of address.

Lat/Lon

Display current latitude, longitude.

Speed

Display current speed and average speed since last reset.

Distance

Display distance and time from last reset.

Course

Display current course.

Altitude

Display current altitude.

Click

Determines if “click” sound is used in app.

Sync

Activates/deactivates of synchronization of all app setting with iCloud.

Auto
lock

Activates/deactivates “Auto lock” of your iOS device.

Use it with care – setting Auto-lock to off when iPhone/iPad is not connected to the charger will quickly discharge device battery.

Sound volume

Determines volume of sound effects of app.

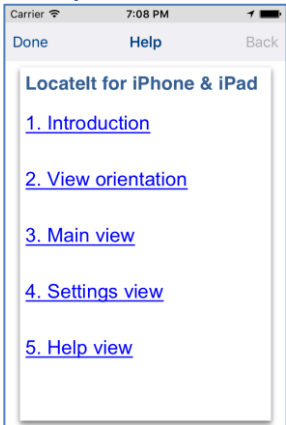

Run in background

Determines if location is updated in background – when app is not active and map is not shown. Use it with care – setting “Run in background” to on when iPhone/iPad is not connected to the charger will quickly discharge device battery.

[\[Back to top\]](#)

5. Help view

Controls available in this view:

Done

Terminate view.

Swipe to the right

Same as Done-button.

Back

Navigate to previous place in help
