# 1. Introduction

LoginIt is very efficient and user-friendly app for keeping your logins and credit cards secure and available from all of yours iOS devices.

You can login to your favorite web sites and applications; make purchases in online stores without taping logins, credit card numbers, passwords and CVV codes

Carrier ᅙ	8:28 PM	100%

Tap 'Home' to copy Login		í

App was designed to make copying of login and credit card data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 3.3 authentication with fingerprint is supported on iOS devices with Touch ID.

Starting from version 2.0 app supports iCloud data synchronization - data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, make purchases in online stores, etc.

LoginIt was tested with app Remote by Apple and Apple TV - it is really very convenient.

Just register Login/Credit card data and Password/CVV code in your app. Later on you can easy copy them using very useful feature – auto copy of login/credit card number and password/CVV code.

Login/Credit card data is copied just by selecting it in app:

Copying operation is performed automatically during switching from LoginIt to another application. Information about copied item is communicated to the user by local notification.

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Data might be protected by activating of PIN code.

You can customize the app functionality by using "Settings-function".

App "<u>Help-function</u>" available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

App is optimized for iOS9, iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken mainly from iPhone 6 Plus, iOS8.x and iOS7.x version of LoginIt. On devices, which are running older versions of iOS (6.x and 5.x) some controls will look slightly different. Following table contains couple of examples of such differences.

Stepper iOS6.x, iOS5.x	
iOS9.x, iOS8.x, iOS7.x:	
Slider iOS5.x, iOS6.x	
iOS9.x, iOS7.x:	

Here you can see examples of differences in layouts of views on different iOS devices.

# 2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

1) Tap "New" in main view and register new login record – in example John's login to iTunes:

Carrier 🗢	11:04	100 % 페
Done	Deatils	Save
Name, description	iTunes - John	
Login, user name, e-mail	john.smith@jz-it-konsult.se	
Password	[VRM#>nd@loV#kj^o%\$/2+Q`=EbGNw Generate	
А,В,С,	1,2,3,	
a,b,c,	!,@,#, <b>()</b>	
Length 32		
Delete		Login Credit card

Enter:

- "Name, description" name of login record, which will be visible from main view.
- "Login, user name, e-mail".
- "Password", you may tap "Generate" button in this case password will be generated for you.
- 2) Tap "Save" to save record.
- 3) Details view will close, and you will see:

Carrier ᅙ	6:36 AM	100%
New	LoginIt	Details
	<ul> <li>Enter search text</li> </ul>	
Amazon		
Bankld (p)

iTunes - John		Login will be copied
iTunes Connect John		
Library		
Nespresso.cpm		
Netflix		
Norwegian.com		
Pekao24		
Rayanair		
Tap 'Home' to copy Login		(i)

To the right of name of selected login record is information about item which will be copied next. In our case it is login.

4) Now tap or double tap "Home" to switch to "Find iPhone" app. You will see:

John's e-mail is copied to iPhone/iPad pasteboard (clipboard).

5) Switch to "Find iPhone" app and paste info to "Login" field. Switch back to LoginIt. You will see:

Carrier 🗢	6:37 AM	100%
New	LoginIt	Details
	♀ Enter search text	
Amazon

Pekao24		
Rayanair		
Tap 'Home' to copy Password		í

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

6) Now tap or double tap "Home" again to switch to "Find iPhone" app. You will see:

John's password is copied to iPhone/iPad pasteboard (clipboard).

7) Switch to "Find iPhone" app and paste info to "Password" field.

# 3. View orientation

All app views works in portrait and landscape orientation:

Carrier 🗢	9:13 AM	100% 📖

Wizzair.com		
Zalando		
zz Asia & Stefan net		
zz Avanza - Jurek		
zz Avanza - Natalia		
Tap 'Home' to copy Passwo	ord	í

This functionality might be used when you want to skip coping login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

• Yellow color – login will be copied when you next time you tap "Home" button:

iTunes - John	Login will be copied
or	
John Visa	Card Nr will be copied

• Green color – password will be copied when you next time you tap "Home" button:

iTunes - John	Password will be copied
or	
John Visa	CVV will be copied

• Red color – empty login or password will be copied when you next time you tap "Home" button:

Wizzair.com	Empty Login will be copied
or	
iTunes - John	Empty Password will be copied

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate "Document & Data" in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

Carrier 🗢	8:43 PM	100%

Tap 'Home' to copy Login		(j)

# 5. Details view

Carrier ᅙ	5:56 AM	100%
Done	Deatils	Save
Name, description	iTunes - John	
Login, user name, e-mail	john.smith@jz-it-konsult.se	
Password	VRM#>nd@loV#kj^o%\$/2+Q`=EbGNw	
	Generate	
А,В,С,	1,2,3,	
a,b,c,	!,@,#,	
Length 32		
Delete		Login Credit card

LoginIt details view shows details about login:

- 1) Name, description name of login record shown in main view.
- 2) Login, user name, e-mail.
- 3) Password.

Just enter data and tap "Done" or "Save".

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Carrier 🗢	5:57 AM	100%
Done	Deatils	Save
Name, description	John Visa	
Card number	1234 5678 9012 3456	
Name an end	John Smith	
Name on card	John Smith	
PIN	1234	
CVV	567	
E	00//0	
Expires	02/18	
If lost	+ 1 234 5678 901	
Delete		Login Credit card

LoginIt details view shows details about credit card:

- 1) Name, description name of login record shown in main view.
- 2) Card number.
- 3) Name on card.
- 4) PIN code.
- 5) CVV code.
- 6) Expires expires date.
- 7) If lost phone to call when card is lost.

Just enter data and tap "Done" or "Save".

Controls in this view:

Done	
Terminate view without saving changes. When changes were made user will be prompted for decision what to do, by following alert:	

Carrier 🗢		6:03 PM	100% 📖
		Deatils	Save
Name, description	John Visa		
Card number	1234 5678 9012 3	3456	
Name on card	John Smith	Data has changed. Do You want to save it?	
PIN	1234	Yes	
		No	
CVV	567	Cancel	
Expires	02/18		
If lost	+ 1 234 5678 901		
Delete			Login Credit card

User will have three possibilities:

- 1) Save changes, and exit, by choosing "Yes".
- 2) Discard changes and exit, by selecting "No".
- 3) Continue editing, by selecting "Cancel".

#### Save

Terminate view and save changes. When data is not consistent you will get one of following alerts:

Record with same name/ description already exists!

OK

There is already record with same name/description as current record.

You are trying to save record without name/description.

Length	32	_	+

Defines length of automatically generated password.

#### Swiping to the right.

Same effect as taping "Done" button.

# Swiping up moves to previous record and shows it in <u>Details view</u>. It has same effect as:

- Tapping "Done"
- Selecting previous record
- Tapping "Details"
- When there is no previous record, the following will be shown:
