# 1. Introduction

LoginIt is very efficient and user-friendly app for keeping your logins and credit cards secure and available from all of yours iOS devices.

You can login to your favorite web sites and applications; make purchases in online stores without taping logins, credit card numbers, passwords and CVV codes

App was designed to make copying of login and credit card data as quick and easy as

possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 3.3 authentication with fingerprint is supported on iOS devices with Touch ID.

Starting from version 2.0 app supports iCloud data synchronization - data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, make

purchases in online stores, etc.

LoginIt was tested with app Remote by Apple and Apple TV - it is really very convenient.

Just register Login/Credit card data and Password/CVV code in your app. Later on you can easy copy them using very useful feature – auto copy of login/credit card number and password/CVV code.

Login/Credit card data is copied just by selecting it in app:

Copying operation is performed automatically during switching from LoginIt to another application.

Information about copied item is communicated to the user by local notification.

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Data might be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains

detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

App is optimized for iOS9, iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken mainly from iPhone 6 Plus, iOS8.x and iOS7.x version of LoginIt. On devices, which are

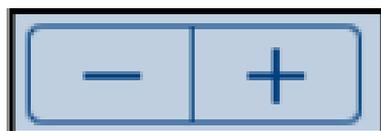

running older versions of iOS (6.x and 5.x) some controls will look slightly different. Following table contains couple of examples of such differences.

## Stepper

iOS6.x, iOS5.x

iOS9.x, iOS8.x, iOS7.x:

## Slider

## 2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

- 1) Tap "New" in main view and register new login record – in example John's login to iTunes:

Done

Deatils

Save

Name, description

iTunes - John

Login, user name, e-mail

john.smith@jz-it-konsult.se

Password

Generate

ISW;R2l\_\_[=-hZo.XBW@/7\_pl1...

A,B,C,...

1,2,3,...

a,b,c,...

!,@,#,...

Length

32

-

+

Delete

Login

Credit card

Enter:

- “Name, description” – name of login record, which will be visible from main view.
- “Login, user name, e-mail”.
- “Password”, you may tap “Generate” button – in this case password will be generated for you.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

New

portrait orientation

or

## Landscape orientation

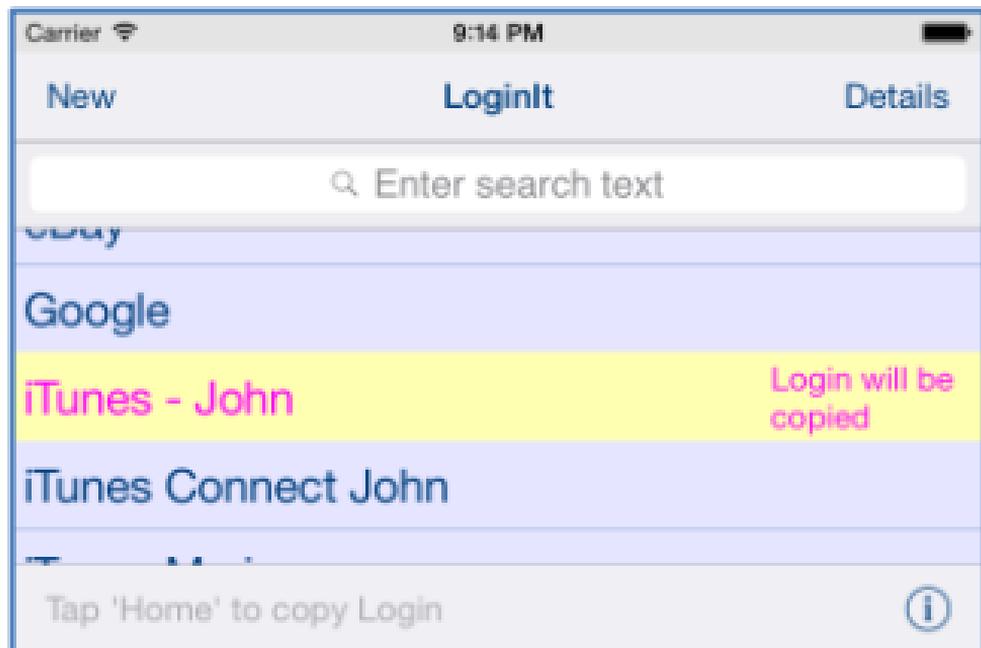

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

## 4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start app you will be directed to that view.

Here is detailed description of controls available from Main view:

🔍 Enter search text

Search bar – used for searching -“filtering” of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Tapping  
on  
Search  
button  
hides  
keyboard

Main view will show only  
items, which satisfies search

condition; search text stays in search bar:

Activated search bar, here:

“ba”

Searched text

Button which  
clears search  
text.

Starts [Details view](#) – view  
used for creation of new login  
records.

## Details

Opens [Details view](#) for editing or viewing of existing login records.

Activates [Settings view](#) – view used to change app parameters and options.

## **Double tap on login.**

Same as following actions:

- 1) Mark login.
- 2) Tap “Details” button.

Swipe login to the left or to the right.

Copy next item “Login” or “Password”:

This functionality might be used when you want to skip copying login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

- Yellow color – login or card number will be copied when you next time you tap “Home” button:

iTunes - John

Login will be copied

or

John Visa

Card Nr will be copied

- Green color – password will be copied when you next time you tap “Home” button:

iTunes - John

Password will be copied

or

John Visa

CVV will be copied

- Red color – empty login or password will be copied when you next time you tap “Home” button:

Wizzair.com

Empty Login will be copied

or

iTunes - John

Empty Password will be copied

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

New

## 7. PIN code view

This view is used to enter PIN code, when PIN code is activated.

The image shows a mobile application interface for PIN entry. At the top, the status bar displays "Carrier" with a signal strength icon, the time "9:38 PM", and a battery level icon. Below the status bar, the title "LoginIt - PIN check" is centered. The main content area has a light blue background and features the text "Enter PIN" in a large, bold, dark blue font. Below the text is a dark blue rectangular input field. Underneath the input field is a numeric keypad with four rows of buttons. The first row contains buttons for digits 1, 2, and 3. The second row contains buttons for digits 4, 5, and 6. The third row contains buttons for digits 7, 8, and 9. The fourth row contains buttons for "Del", "0", and "OK". All buttons are dark blue with white text.

Carrier 9:38 PM

View will appear, when there is no activity in the app during time determined in app settings. It does not matter if app is running in background or terminated.

Setting of “PIN-lock when no activity” to something between 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3 times in sequence app will be locked for 6 minutes, and so on:
