# 1. Introduction

LoginIt is very efficient and user-friendly app for keeping your logins and credit cards secure and available from all of your iOS devices.

You can login to your favorite web sites and applications; make purchases in online stores without typing logins, credit card numbers, passwords and CVV codes

App was designed to make copying of login and credit card

data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 3.3 authentication with fingerprint is supported on iOS devices with Touch ID.

Starting from version 2.0 app supports iCloud data synchronization - data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, make purchases in online stores, etc.

LoginIt was tested with app

Remote by Apple and Apple TV - it is really very convenient.

Just register Login/Credit card data and Password/CVV code in your app. Later on you can easy copy them using very useful feature – auto copy of login/credit card number and password/CVV code.

Login/Credit card data is copied just by selecting it in app:

Copying operation is performed automatically during switching from LoginIt to another application.

Information about copied item is communicated to the user by local notification.

If you wish you can generate strong random passwords, which

are highly secure and difficult to crack or guess.

Data might be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

App is optimized for iOS9, iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken mainly from iPhone 6 Plus, iOS8.x and iOS7.x version of LoginIt. On devices, which are running older versions of iOS (6.x and 5.x) some controls will look slightly different. Following table contains couple of examples of such differences.

## Stepper

iOS6.x, iOS5.x

iOS9.x, iOS8.x, iOS7.x:

## Slider

iOS5.x, iOS6.x

iOS9.x, iOS8.x, iOS7.x:

## 2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

- 1) Tap "New" in main view and register new login record – in example John's login to iTunes:

Done

Deatils

Save

Name, description

iTunes - John

Login, user name, e-mail

john.smith@jz-it-konsult.se

Password

Generate

|VRM#&gt;nd@loV.\_#kj^o%\$/2+Q...

A,B,C,...

1,2,3,...

a,b,c,...

!,@,#,...

Length

32

-

+

Delete

Login

Credit card

Enter:

- “Name, description” – name of login record, which will be visible from main view.
- “Login, user name, e-mail”.
- “Password”, you may tap “Generate” button – in this case password will be generated for you.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

New

LoginIt

Details

Bilia JZ IT- Konsult AB

iTunes - John

Login will be  
copied

iTunes Connect John

iTunes Maria

Library

Nespresso.cpm

Netflix

To the right of name of selected login record is information about item which will be copied next. In our case it is login.

4) Now tap or double tap “Home” to switch to “Find iPhone” app. You will see:

John's e-mail is copied to iPhone/iPad pasteboard (clipboard).

5) Switch to "Find iPhone" app and paste info to "Login" field. Switch back to LoginIt. You will see:

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

'Home' to copy Password

6) Now tap or double tap “Home” again to switch to “Find iPhone” app. You will see:

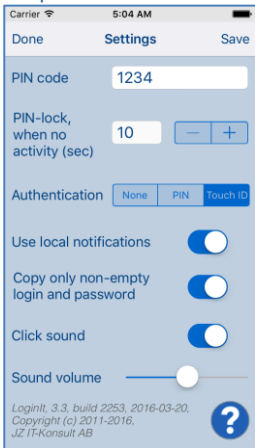

John's password is copied to iPhone/iPad pasteboard (clipboard).

- 7) Switch to "Find iPhone" app and paste info to "Password" field.

[\[Back to top\]](#)

### 3. View orientation

All app views works in portrait and landscape orientation:

portrait orientation

or

## Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

## 4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start

app you will be directed to that view.

Here is detailed description of controls available from Main view:

Search bar – used for searching -"filtering" of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Carrier 

6:36 AM

eBay

'Home' to copy Password

Activated search bar, here:

“ba”

Searched text

Button which  
clears search  
text.

Starts [Details view](#) – view  
used for creation of new login  
records.

Opens [Details view](#) for editing  
or viewing of existing login  
records.

Activates [Settings view](#) – view used to change app parameters and options.

### **Double tap on login.**

Same as following actions:

- 1) Mark login.
- 2) Tap “Details” button.

**Swipe login to the left or to the right.**

Copy next item “Login” or “Password”:

This functionality might be used when you want to skip coping login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view

have different colors dependent on what will be copied next:

- Yellow color – login or card number will be copied when you next time you tap “Home” button:

|               |                      |
|---------------|----------------------|
| iTunes - John | Login will be copied |
|---------------|----------------------|

or

|           |                        |
|-----------|------------------------|
| John Visa | Card Nr will be copied |
|-----------|------------------------|

- Green color – password or CVV will be copied when you next time you tap “Home” button:

|               |                         |
|---------------|-------------------------|
| iTunes - John | Password will be copied |
|---------------|-------------------------|

or

|           |                    |
|-----------|--------------------|
| John Visa | CVV will be copied |
|-----------|--------------------|

- Red color – empty login or password will be copied when you next time you tap “Home” button:

Wizzair.com

Empty Login  
will be copied

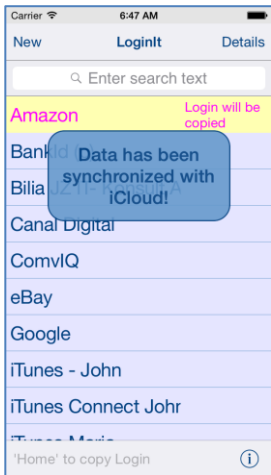

or

iTunes - John

Empty Password  
will be copied

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized. To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

[\[Back to top\]](#)

## 5. Details view

User will have three

possibilities:

- 1) Save changes, and exit, by choosing “Yes”.
- 2) Discard changes and exit, by selecting “No”.
- 3) Continue editing, by selecting “Cancel”.

Save

Terminate view and save changes. When data is not consistent you will get one of following alerts:

**Record with same name/  
description already exists!**

OK

There is already record with

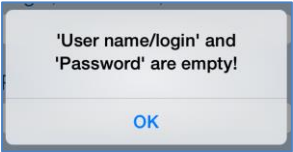

same name/description as current record.

An alert dialog box with a light gray background and a blue border. The text "Name/description is empty!" is centered in bold black font. Below the text is a horizontal line, and at the bottom center is a blue "OK" button.

**Name/description is empty!**

OK

You are trying to save record without name/description.

An alert dialog box with a light gray background and a blue border. The text "'User name/login' and 'Password' are empty!" is centered in bold black font. Below the text is a horizontal line, and at the bottom center is a blue "OK" button.

**'User name/login' and  
'Password' are empty!**

OK

You are trying to save record without login and password.

**'Password' is empty. Do You want to continue?**

Yes

No

It is warning about empty password, if you want to have it so tap “Yes” otherwise tap “No”.

**'User name/login' is empty. Do You want to continue?**

Yes

No

It is warning about empty login, if you want to have it so tap “Yes” otherwise tap “No”.

Generate

Generate password.

A,B,C,...

Use capital letters in automatically generated password.

a,b,c,...

Use lower case letters in automatically generated password.

Use digits in automatically generated password.

Use special characters in automatically generated password.

Defines length of automatically generated password.

**Swiping to the right.**

Same effect as taping "Done" button.

Swiping up moves to previous record and shows it in **Details view**.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no previous record, the following will be shown

Swiping down moves to previous record and shows it in **Details view**.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no next record, the following will be shown:

## 7. PIN code view

This view is used to enter PIN code, when PIN code is activated.

Carrier  8:26 PM 

LoginIt - PIN check

Enter PIN

|     |   |    |
|-----|---|----|
| 1   | 2 | 3  |
| 4   | 5 | 6  |
| 7   | 8 | 9  |
| Del | 0 | OK |

View will appear, when there is no activity in the app during time determined by app settings. It does not matter if app is running or in background or terminated.

Setting of "PIN-lock when no activity" to something between 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3 times in sequence app will be locked for 6 minutes, and so on:
