History   🌐   Show all   ⓘ

To maintain your events and activities just create reminders for them.

Later on, when reminders are "in time" or "overdue", the local notifications will be sent to you:

1) A ring tone will be played.
2) The local notification information will be shown on your device. Notification will be also shown on your Apple Watch if it is paired with iPhone.
3) The number of "in time" or "overdue" reminders will appear as an app icon badge – a small number in the upper right corner of the app icon.

The app might be used for:

1) Notifications about private or business events.
2) Dispensing of medicines.
3) Time management.
4) Scheduling.
5) Tracking of event completion, by recording notes for every completed

event or activity.

All reminders when they are "in time" or "overdue" need to be marked as "completed" or removed, otherwise a new notification will be resent.

Marking as "completed" might be performed by editing of the reminder status or simply by swiping of the reminder to the right. Reminders marked as done are saved in history.

App maintains five types of reminders:

1) One-time events – a reminder about something what need to be done on a defined date and time.
2) Daily, one or couple of times per day – requiring events with repetition pattern based on days.
3) Weekly events – requiring events with repetition pattern based on weeks.
4) Monthly events – requiring events with repetition pattern based on moths.

5) Yearly events – requiring events with repetition pattern based on years.

In RemindIt app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time you will have option to get your latest data back.

Starting from version 2.0 app supports iCloud data synchronization - data on all iOS devices with same iCloud account will be synchronized. You can decide what kind of data should be synchronized (saved in iCloud); rest of data is saved locally.

App behavior can be customize by modification of settings – just tap "settings button" and adjust app parameters.

App help available in the app or on

WWW contains detailed description of all app functions, services and options.

All app activities and events are recorded in the system log. Statistics about the app usage are accumulated.

App is optimized for iOS 9, iOS 8, iOS 7, and iOS 6 and supports all existing iOS devices.

Pictures in current document are taken from iOS9.x, iOS8.x and iOS7.x version of RemindIt. On devices, which are running older versions of iOS (6.x) some controls will look slightly different. Following table contains couple of examples of such differences.

2. Local notifications

When reminder become "due" the local notification is sent to the user:
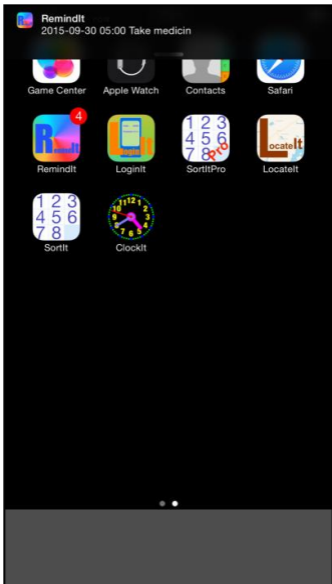

A ring tone is played. Information about reminder is shown on top of screen.

Today   Notifications

– a small number in the upper right corner of the app icon.

3. View orientation

All app view works in portrait and landscape orientation:

Portrait orientation

or

Landscape orientation

Just select orientation, which is most convenient for you. View orientation might be change at any time.

4. App views on different iOS devices

App supports all current iOS devices:

- iPhone 4, 4s
- iPhone 5, 5s
- iPhone 6, 6s
- iPhone 6 Plus, 6s Plus
- iPad 2, Retina, Air, Air 2

App views are designed to optimally use different iOS devices capabilities. In following sections you can see couple of screen shots of one of app view on different iOS devices with different versions of iOS.

5. Common information fields, controls and alerts

In this section are described all common information fields, controls and alerts used in almost all app views.

5.1 Common information fields, controls (Reminders and Series of Reminders)

Done

Terminate view without saving changes. When changes were made user will be prompted for decision what to do, by showing following alert:

Description 👤 `5 minutes`

New reminder

Data has changed. Do You want to save it?

Yes

No

Cancel

Time

Every

M	T	W	T	F	S	S
☐	☐	☒	☐	☐	☐	☐

Day

Start `2015-09-30` ➖ ➕

End `X` ➖ ➕

| Once | Days | Weeks | Months | Years |

User will have three possibilities:

1) Save changes, and exit, by choosing "Yes".
2) Discard changes and exit, by selecting "No".
3) Continue editing, by selecting "Cancel".

Swipe to the right.
Same as tapping "Done" button.

Save
Terminate view and save changes.

For every reminder you can select time when local notification will be sent to you. You may select time from 0 minutes to 4 weeks. Just tap on field – and picker with all possible choices will popup:
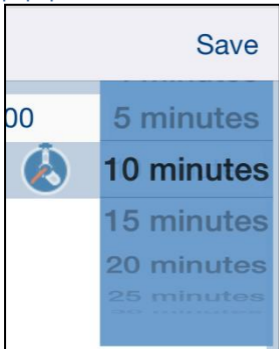

Description

Description of reminded event.

To enter description, just tap on the field, keyboard will pop-up, and you will have possibility to tape your text.

Time

08:30 AM

Time of reminded event.
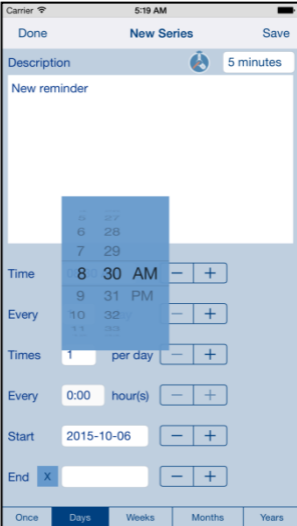

To enter time, just tap on the field, time-picker will pop-up, and you will have possibility to select time.

Time stepper:

To make adjustments and corrections of time you may use stepper:

Tapping on (-) decreases time by one minute.
Tapping on (+) increases time by one minute.

Keeping stepper pressed cause continuous value changes.

Date, Start date

| Date | 2015-10-05 |

| Start | 2015-10-05 |

Date for reminder or start date for series of reminders – date when series of reminders starts.

To enter date, just tap on the field, date-picker will pop-up, and you will have possibility to select date.

7. Reminders and Series of Reminders

Reminder is message that reminds you to do something (Reminder - according to Cambridge Dictionaries Online). Reminders can be "single" or "multiple". Single reminder reminds you about something what is going to happen one time – for example about visiting the dentist on 10-th November. Multiple or requiring reminders remind you about something what is going to happen regularly, like every year, every month, every 4.th hour.

In RemindIt app multiple reminders are described with help of Series of reminders.

Reminders created with help of Series of reminders have exactly same properties as "single reminders" - might be edited, excluded from series or deleted without affecting of others reminders in series.

[Back to top]

8. Reminder details view

Remainder details view shows details about reminder and allows:

1) Adjust time when local notification about reminder will be sent, here you can select time from 0 minutes to 4 weeks.

2) Access single reminder of series.

3) Initialize editing of one time reminder.

4) Change status of reminder to "Completed".

5) Add comment to completed reminders.

9. Series of reminders view

View contains five sub-views used for different types of reminders:

1) <u>Once</u>: one-time events –reminder about something what need to be done on a defined date and time.

2) <u>Days:</u> daily events, one or couple of times per day – requiring events with repetition pattern based on days.

3) <u>Weeks:</u> weekly events – requiring events with repetition pattern based on weeks.

4) <u>Months:</u> monthly events – requiring events with repetition pattern based on moths.

5) <u>Years:</u> yearly events – requiring events with repetition pattern based on years.

[Back to top]

9.1 Once

This sub-view is used for creation of one-time events –reminder about something what need to be done on a defined date and time.

To create reminder of this type you need to supply following information:

1) Time when local notification will be sent.
2) Description.
3) Reminder time.
4) Reminder date – the day when reminded event is going to happen.

Controls in this view are described in [Common information fields, controls (Reminders and Series of Reminders)](#)

9.2 Days

This sub-view is used for creation of reminders about events which are going to happen daily, every day, every second day, every third day,…, one or couple of times per day – requiring events with repetition pattern based on days.

To create reminder of this type you need to supply following information:

1) Time when local notification will be sent.
2) Description.
3) Reminder time.
4) Repetition pattern based on days, like every day, every second day…
5) Repetition pattern based on hours:
   a. How many times per day.
   b. How many hours between events.
6) Start date.
7) End date.

Show future reminders for following number of days	31	− +

Determines how many requiring reminders from series will be shown in [Main view](). For example when this parameter is 31, Main view will contain 31 reminders of type "every day".

Parameter affects only requiring reminders. Every series of reminders will have at least one "representative" in Main view.

When "End date" does not expire and some reminders from series are moved to history or deleted, the new "next in series" reminders will be populated.

Sounds	Click: On, Alert: On

Determines system sounds, there are two types of sounds, which can be configured:

- Click – confirmation sound for opening the view, changing

orientation, etc.
- Alert – ring tone for local notification

You may select all combinations of system sounds by selecting them with picker

Max number of historical reminders	10000	−	+

Determines maximum number of entries in reminders history. When number of historical reminders excides this number the oldest reminders will be deleted.

Max number of log entries	10000	−	+

Determines maximum number of entries in system log. When number of log entries excides this number the oldest log entries will be deleted.
